

Docket No. AT9-99-458

# ABSTRACT OF THE DISCLOSURE

## 5 WEB PAGE THUMBNAILS AND USER CONFIGURED COMPLEMENTARY INFORMATION PROVIDED FROM A SERVER

A method for presenting content from the page in a distributed database. In a preferred embodiment, a server receives a request from a client for a page from  
10 the database wherein the page has a plurality of links to linked pages in the database. The server retrieves the page and generates a set of thumbnails of the linked pages in the database. The server then sends the page and the set of thumbnails to the client.
